

### **1.Reduced traffic after diversion ends.**

The number of vehicles per month coming south through the village now the A14 diversion has ended is much reduced ( Feb 22,148, March 23,670, April 14,552)

### **2.Daytime speeding is concentrated around commuter periods**

The updated police-focused analysis shows that the largest numbers of daytime speeding vehicles occur:

- during the early morning commute
- particularly around **06:00–07:00**
- mainly on weekdays

The strongest patterns currently are:

- **Northbound:** Wednesday mornings
- **Southbound:** Friday mornings

### **3. Weekend behaviour differs**

Weekend traffic volumes are lower, but the proportion of speeding vehicles is often higher, especially during evening periods
